

Regulus Files NI 43-101 Technical Report on SEDAR for AntaKori Mineral Resource Estimate

VANCOUVER, CANADA (April 15, 2019) – **Regulus Resources Inc.** (“**Regulus**” or the “**Company**”) (TSX.V – **REG**) is pleased to announce the filing on SEDAR of a National Instrument 43-101 technical report for the recently announced updated mineral resource estimate at its AntaKori copper-gold project in northern Peru (see news release dated March 1, 2019).

The report, effective February 22, 2019, was prepared by Amec Foster Wheeler (Perú) S. A., a Wood company at the request of Regulus. The report titled, "AntaKori Project, Cajamarca Province, Peru, NI 43-101 Technical Report" has been filed on the SEDAR website at www.sedar.com and will be posted on the Company’s website at www.regulusresources.com.

About Regulus Resources Inc.

Regulus Resources Inc. is an international mineral exploration company run by an experienced technical and management team, with a portfolio of precious and base metal exploration properties located in North and South America. The principal project held by Regulus is the AntaKori copper-gold-silver project in northern Peru. Mineralization remains open in most directions and drilling is currently underway to confirm and increase the size of the resource. For further information on Regulus Resources Inc., please consult our website at www.regulusresources.com.
